On-line Job Portal (Hna Inpui) is an application that deals specifically with employment. The motive is to facilitate both the job seeker as well as the employer looking for employees for their business/Company. Any job seeker can search for available jobs at any moment with updated information. The system will act as a platform so that there could be a direct connection between job seeker and employer. The software is build in for application through Internet, Android, IOS applications and was launched by Mizoram Youth Commission on Dt. 9<sup>th</sup> October 2020.

Talented and hardworking youths within Mizoram are not getting adequate job opportunities due to limited access to job information and the absence of a unified platform to cater job seekers and employers. Finding the right job and finding the right candidate is equally challenging for both job seekers and employers without the unified job portal. Now the internet has made an enormous impact on knowledge management and information dissemination all over the world. The internet has changed the way of looking for job vacancies and searching for right and qualified candidates through Job portal system which has made job searching process easier.

The project was designed and developed to eliminate or reduce manual work in job searching process and also reduce cost and time spent when advertising job vacancies. The project allows job seekers to register online, search and establish communication for employment and also allows employers to register online, post job vacancies and look for suitable candidates. Online Job Portal System is developed to provide a common platform for interaction to address the communication gap between job seekers and recruiters. The system indeed made the job searching processes much simpler and easier.

Mizoram is a developing state and so is the change in technology. Due to this change in technology, job recruitment must also change because the use of the internet is also frequent then developing an online job portal will be of great impact to job seekers and employers. The system is reliable because most youths are ever using the internet for browsing and entertainment. The online job portal uses the internet to advertise and find the best people for jobs. The system improve efficiency in the employment sector and also provide jobs catalogue and information to members or users and help them decide on which jobs to apply.

At a very low cost, the Internet offers employers and job searchers access to detailed and up-to-date information about job searchers and job vacancies in different locations around the state.
